

HEF[®] GROUPE

Surface materials engineering

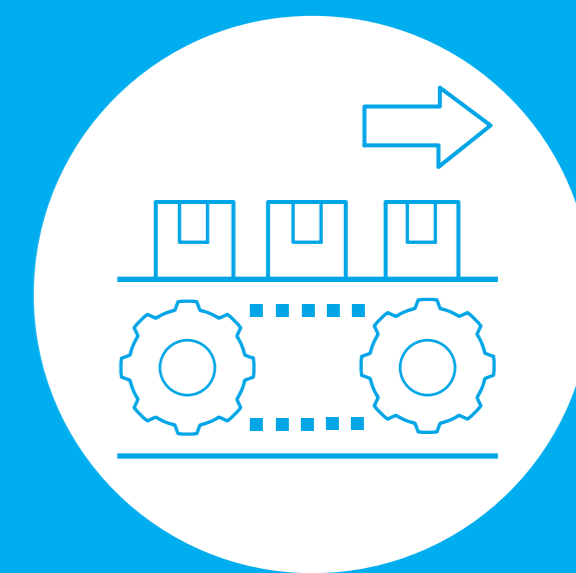

CLIN[™] technology for differential system

CLIN[™] technologies, nitrocarburizing processes in ionic liquid medium with low environment impact, combined several benefits to increase the differential parts performance :

- Advanced wear, fatigue and seizure resistance
- Improved corrosion resistance
- Increasing parts lifetime
- No risk of peeling and cracking

Why HEF for your nitrocarburizing needs?

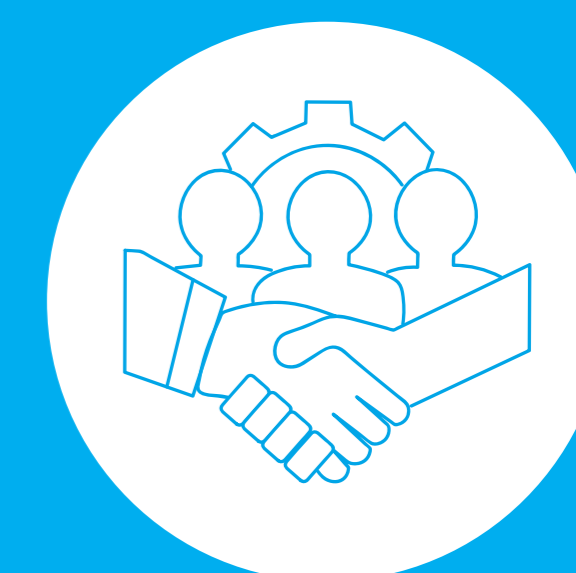

Equipment

Design and manufacture of equipment (conception, industrialisation, maintenance)

R&D to industry

Formulation and manufacturing of consumables QPQ[™], ARCOR[™], TENIFER[™]

Jobbing

Full process control, adaptability and co-development

Recycling

Consumables recycling and waste management for low emission
